Working with the PDMP Database: Registration, Searching, Utilization

Brent I. Fox, PharmD, PhD

Timothy A. Martin, PharmD

AUBURN UNIVERSITY

HARRISON SCHOOL OF PHARMACY
Health Outcomes Research and Policy

How Can I utilize the Information In The Database?

Physicians: When you have a patient encounter and you suspect that abuse is likely, you should access the database

Pharmacists: When you are presented with a prescription and you suspect that abuse is likely, you should access the database

You must have a legitimate reason to access the database!

Is there Anything I Should Not Do with the Data?

If you intentionally make an unauthorized disclosure of information contained in the database, you shall be guilty of a **Class A misdemeanor**.

If you intentionally obtain unauthorized access to or you alter or destroy information contained in the database, you shall be guilty of a **Class C felony**. (Act 2004-443, p. 781, § 7.)

Reports generated from the database contain confidential information, including patient identifiers, and are not public records. The information should not be provided to any other persons or entity.

The information can be discussed with other healthcare professionals on a patient-specific basis when needed

Who May Access the Database For Cause?

- Certifying boards
- State licensed practitioners
- State licensed pharmacists
- State licensed physician assistants
- State, local, and federal law enforcement authorities (employed in the state)
- State licensed certified nurse practitioners
- State licensed nurse midwives
- Medicaid Agency (for Medicaid recipients only)
- Physician delegates

Report Disclaimer

- No Warrant Is Made As To the Accuracy of the Information
- The information is based on data provided by the dispensing entities
- For questions or for more information about any prescription, please contact the dispenser or the prescriber
- The report contains confidential information, including patient identifiers, and is not a public record. The information should not be provided to any other persons or entity, including the patient

What Happens with the Reports?

- A list of pharmacies not reporting or under-reporting to the database is given to the Board of Pharmacy at least every 6 months
- A list of dispensing physicians who do not report is given to the Board of Medical examiners at least every 6 months
- Drug Utilization Review letters to prescribers and dispensers whose patient has visited 6 or more prescribers or dispensers in one month

Working with the PDMP Database: Reporting

Mr. John Felton

Health Information Design

AUBURN UNIVERSITY

HARRISON SCHOOL OF PHARMACY
Health Outcomes Research and Policy

Instructions for setting up an account are listed below.

* You can begin submitting data as soon as your account has been established. See Creating Your

Account for more information.

* Dispensers are required to report their data on a daily basis. Data collection began on April 1, 2006, and reporting began on April 7, 2006.

October 2014 Rule Change

Daily reporting to the AL PDMP begins immediately.

Daily Reporting Overview

On October 20, 2014, Rule 420-7-2-.12 was passed requiring entities and practitioners (except veterinarians) that dispense Class II-V controlled substances to report data to the controlled substance database on a daily basis. The purpose of this new rule is to assist with the identification, intervention, prevention, and education of abused, misused, and diverted controlled substances within the state of Alabama.

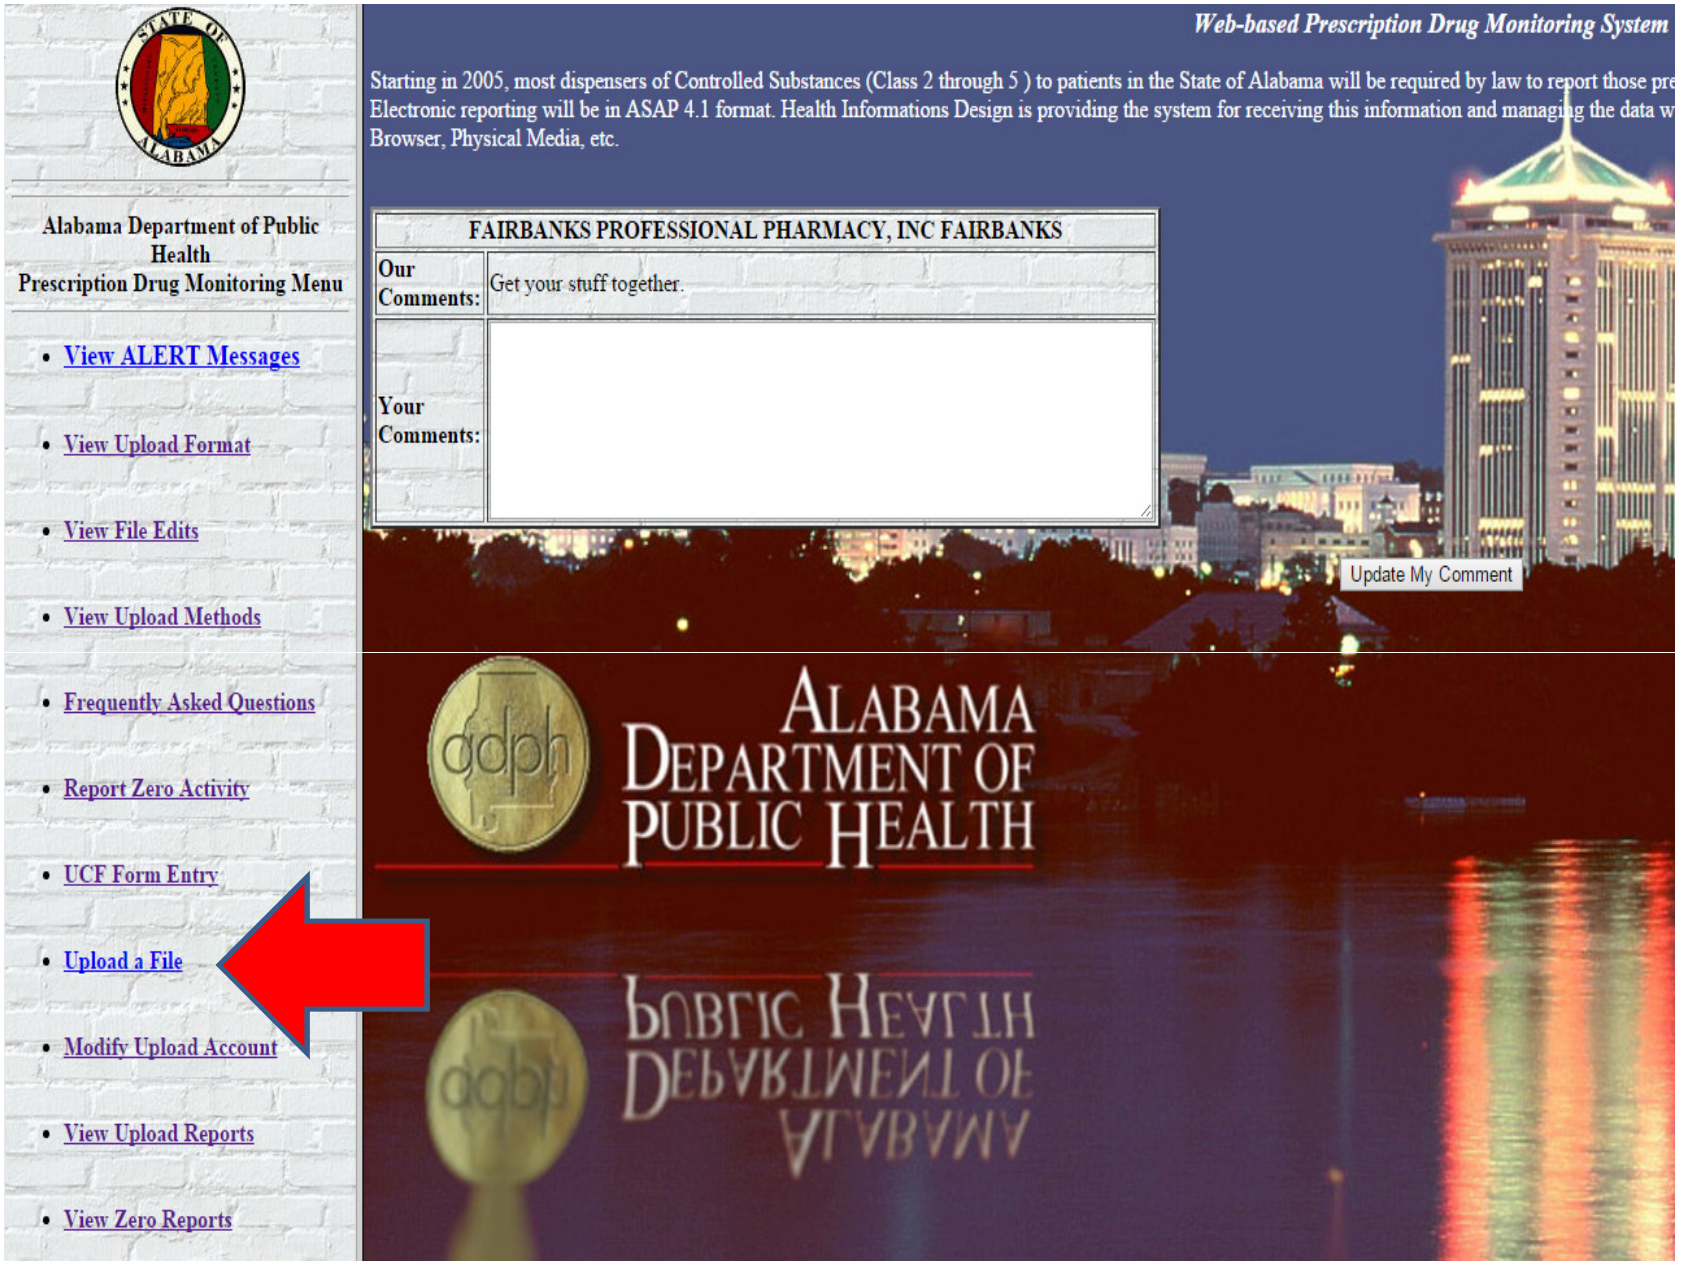
Daily reporting should begin immediately. The PDMP will allow a grace period to implement this change until January 1, 2015, at which time the PMDP will begin collecting non-compliance data for the regulatory boards per state law. If you are already reporting to the controlled substance database on a daily basis, please disregard this message.

Daily Reporting Requirements

Entities and practitioners that dispense Class II-V controlled substances must report data to the controlled substance database on a daily basis.

Entities and practitioners required to report daily include but are not limited to:

* Licensed pharmacies



Web-based Prescription Drug Monitoring System

Notes about NDC Numbers	
Use the following information when entering NDC numbers on the UCF:	
• NDCs are 11 digits and use the format 99999-9999-99.	
• When adding an NDC, do not include the dashes, for example, 99999999999.	
• NDCs are typically located on the original medication bottle on the top right corner of the label, prefaced with "NDC-" and followed by the number.	
• Manufacturers often leave off a zero in the NDC. In these instances, you should add the 0 where appropriate, using the following examples as a guideline:	
If the NDC appears this way....	Enter it this way....
1234-5678-90 (missing 0 in first segment)	01234568790
54321-123-98 (missing 0 in 2nd segment)	54321012398

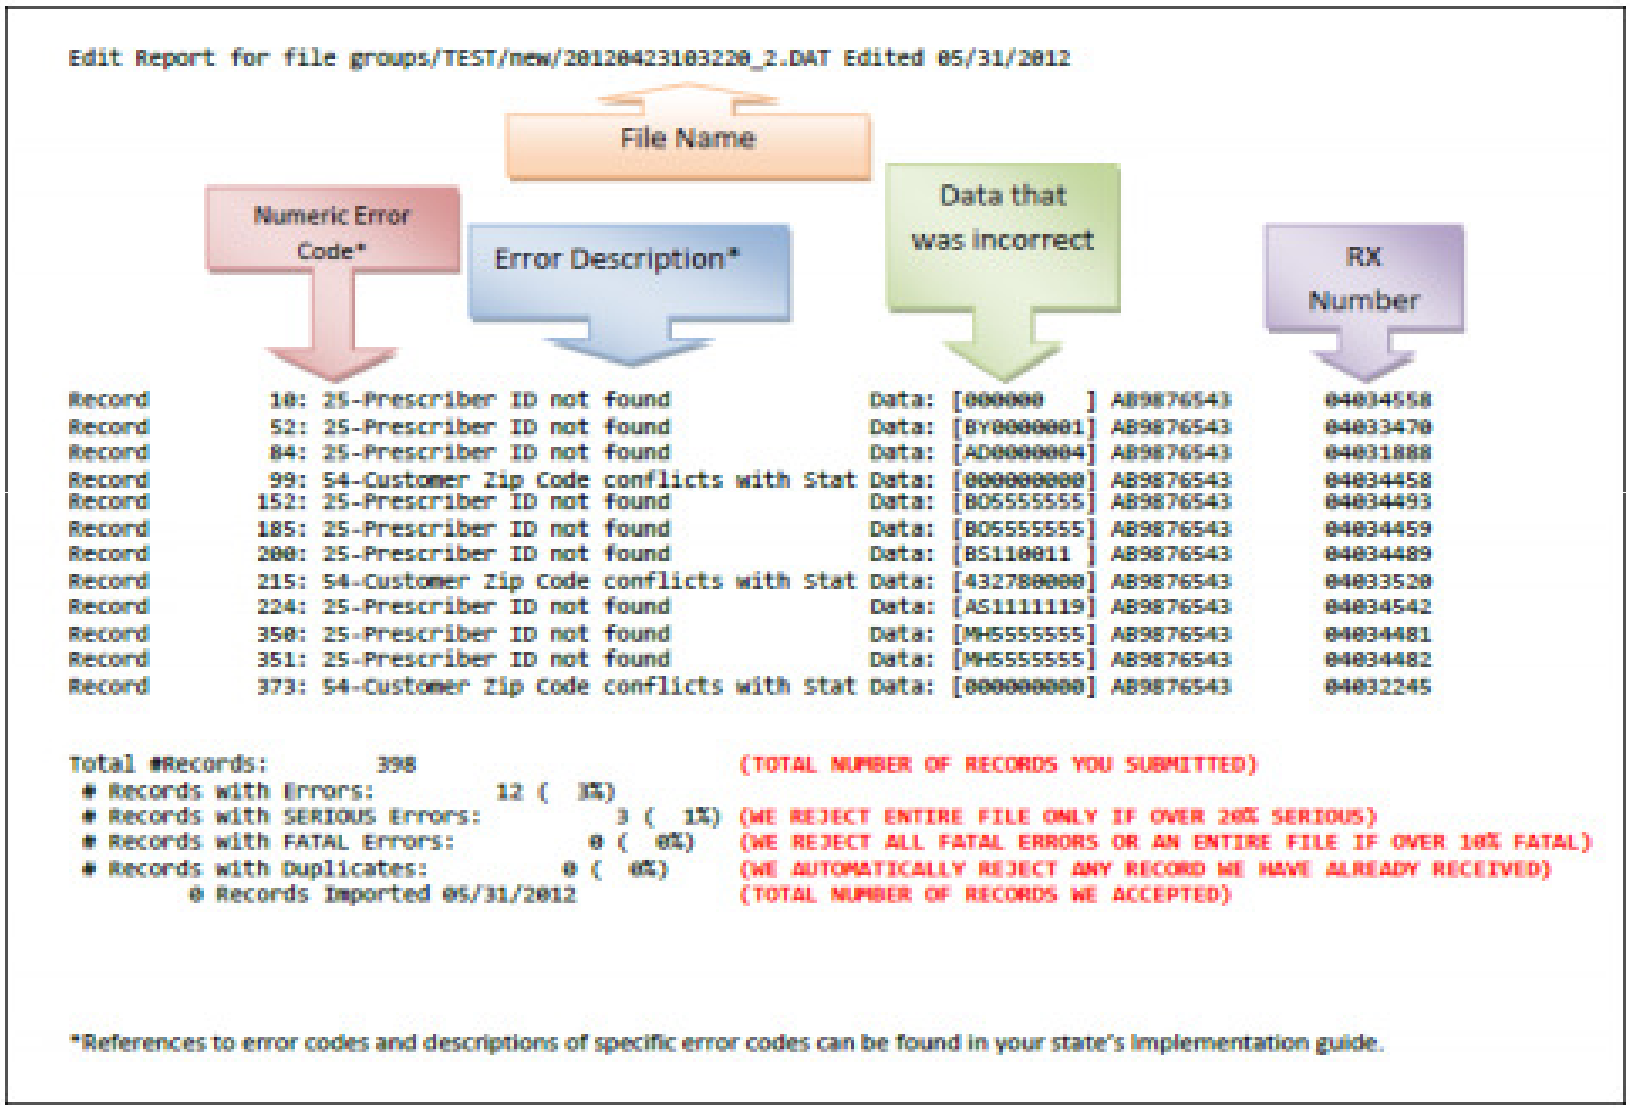
About Upload Reports

- HID provides all submitters of data with an upload report. When creating an account, you are required to submit an e-mail address and a fax number. You can specify if you wish to receive your upload report by either of these methods. If you FTP/SFTP the data, a report will be placed in your home directory on the FTP server.

Example of Error Report



About Upload Reports

- A single claim may be rejected or, if a certain percentage of claims are rejected in an individual file, the entire file may be rejected. We track three types of errors:
  - **Minor** – Incorrect data in non-vital field
  - **Serious** – Record can be loaded with missing or inappropriate data
  - **Fatal** – Record cannot be loaded
- An entire batch may be rejected if:
  - ALL records have Fatal or Serious errors
  - **More than 10%** of the records have Fatal errors
  - **More than 20%** of the records have Serious errors

Health Outcomes Research and Policy

Why Is It Important to Enter the Correct Prescriber's DEA Number and Patient Demographics?

- Information entered into the database is used downstream for many purposes
  - Physicians access it
  - Pharmacists access it
  - Law Enforcement accesses it
- Incorrect information leads to confusion, duplication, and loss of confidence in the Program to accomplish its goals!

For additional help, call the PDMP Technical Support Desk at

1-800-225-6998
