## **Closed Point of Dispensing Plan (POD)**

Prepare your organization to dispense medications by creating a dispensing plan that addresses your organization's specific needs. Each organization is unique in the number and type of its employees [or students, members, etc.], its business operations, or the type of services offered. All of these factors will affect how you dispense medications to your employees [or students, members, etc.]. This template was created to assist organizations as they plan for and set up their own PRIVATE dispensing site. Your organization's plan will describe how you will prepare your organization to dispense medications. If you would like to become a Closed Point of Dispensing (POD) site please complete the dispensing plan information below and return the completed form to the Alabama Department of Public Health (ADPH) Emergency Preparedness Coordinator for your county (see instructions below).

## **Step 1: Make Contact**

Contact the Emergency Preparedness (EP) Coordinator for your county by calling the local health department and asking to speak to the EP Coordinator for your county; or use the ADPH EP Coordinator Locator Map downloadable at adph.org/cep (EP may attach hard copy)
