MANAGE YOUR STRESS BEFORE IT MANAGES YOU

Maury A. West, LGSW
Alabama Department of Public Health
OBJECTIVES

- Identify three stressors in the helping profession
- Identify four effects unresolved stress has on the body and mind
- List two reasons people eat when stressed and identify healthy alternatives to stress eating
- Identify four stress management techniques that can be used at work or at home
STRESSORS IN THE WORKPLACE

- Deadlines
- Clients
- Covering for others
- Meetings
- Time Management
- Clients’ Families
OTHER STRESSORS

- More responsibilities than they can handle
- Needing to complete routine tasks that have little intrinsic value
- Being expected to work long hours
- Unclear job expectations
- Inability to balance professional and personal life
OTHER STRESSORS

- Traffic
- Personal Appointments
- Child or Parent Care
WHAT IS STRESS?

- Conditions that cause physical, psychological, or emotional strain
- Something we all experience, but healthcare workers are at risk
- Stress can be positive or negative
LEVELS OF STRESS

Eustress

Distress

Traumatic Stress
EUSTRESS

- Coined by Dr. Hans Selye
- Eustress is the result of everyday occurrences that causes minimum disruption to our lives
- Disappears when the event is over
- Energizes and motivates
EUSTRESS

- Give an example of eustress in your life
DISTRESS

- Result of less frequent, but fairly common events in our lives
- Events that take over our lives
- Significant disruption occurs
- May take longer to return to a relatively normal state
TRAUMATIC STRESS

- Stress resulting from a catastrophic event
- Combat, terrorist events
- Natural disasters
- Those who experience this are changed forever in some manner
The Concept of Stress is Controversial

- It’s not as simple as once thought
- Everyone perceives stress differently
- Stress is geographic and culture based
The Physiology of Stress

Good Stress

- The good stress allows us to perform at a higher level (fight or flight)
- The production of cortisol improves memory and enhances immune function
- Spikes in blood pressure flood our muscles and brain with oxygen
The Physiology of Stress (cont.)

Bad Stress-Overload

- The allostatic system becomes charged too frequently with NO CHANCE TO VENT the build up of energy
- Too much cortisol will damage memory, hurt or weaken your immune system and enlarge your stomach
Work Stress

Stress measured by blood pressure increase is generally twice as high during the work day compared to when at home or time off. (Pickering, 2005)
Work Stress (contd.)

The worst work-related stress is caused by jobs where people have little control over activities and the rate at which they have to address them. This is inherent in disaster work.
TRAUMATIC STRESS

- The disaster situation—fear, grief, pain, uncontrollable conditions
- Loss, death, gruesome scenes, screams, heat/cold, water
- The community/social response (or lack of)
PHYSICAL EFFECTS OF UNRESOLVED STRESS

- Nausea
- Tics and tremors
- Increased blood pressure
- Heart Racing
- Headaches
EMOTIONAL EFFECTS OF UNRESOLVED STRESS

- Anger
- Irritability
- Sorrow
- Anxiety
- Uncontrolled crying
BEHAVIORAL EFFECTS OF UNRESOLVED STRESS

- Impulsive Behaviors
- Pacing
- Withdrawal and isolation
- Explosive episodes
- Depression
COGNITIVE EFFECTS OF UNRESOLVED STRESS

- Confusion
- Lack of concentration
- Indecisiveness
- Forgetfulness
SO WHY DO WE EAT?

- Learned behavior
- Body chemicals
- COMFORT FOODS
LEARNED BEHAVIOR FOR DEALING WITH STRESS

- Familiarity
- Emotional Security
- Comfortable memories
- Reward for getting through the day
LEARNED BEHAVIOR FOR DEALING WITH STRESS

- Social support
- Going out with friends
- Stuff your emotions: eat, don’t cope
STRESS AND BODY CHEMICALS

Endorphins
Endogenous peptides found in the brain that bind chiefly to opiate receptors and produce good feelings
STRESS AND BODY CHEMICALS

- Serotonin
  - Neurotransmitter chemical derived from the amino acid tryptophan which constricts blood vessels at injury sites
  - Affects emotional state
  - THE FEEL GOOD HORMONE
STRESS AND BODY CHEMICALS

- **Dopamine**
  - Neurotransmitter essential to the function of the central nervous system, having a key role in brain function and human behavior
  - Brain chemical sensing pleasure
STRESS AND BODY CHEMICALS

- Cortisol
  - Steroid hormone associated with inflammation involved in carbohydrate metabolism and the stress reaction
NEW AREA OF CONCERN

- Children of stressed moms often respond by developing poor eating habits
- A “learned stress therapy”
PUTTING IT TOGETHER

- Food used for stress management is both a learned reaction and a body reaction
- Other techniques are essential
Helping Professionals

- are generally self sacrificing
  - many place themselves in danger
  - many will work ‘till it hurts
  - many will skip breaks
  - many will ignore/fight direction to rotate assignments, go off duty or take benefit time even when encouraged
What Can You Do?

Learn
Be Aware
Monitor
Think
Practice
Change
Manage
WHAT CAN WE DO

- Organizational Prevention:
  - Provide training
  - Utilize a buddy system
WHAT CAN WE DO?

- Initiate and encourage breaks
- Allow time for persons who have experienced loss or trauma
- Direct self care activities
WHAT CAN WE DO?

As a supervisor, ask yourself these questions:

- Am I a stressor in the workplace?
- Do I dictate, coach or mentor?
- Do I correct employee behavior in front of others?
- Do I “stir the pot”?
- Does my ego fill the room when I enter?
- Do I bring all of my personal baggage to work with me?
Prevention-Personal

- BE AWARE of limitations and needs
- Recognize when you are:
  - Hungry
  - Angry
  - Lonely
  - Tired
- Practice Self Care
Self-Care

- Maintain support systems—personal and professional
- Use benefit time—take vacations; Schedule personal time
- Maintain boundaries
- Maintain a balance—practice stress management exercises during breaks and opportune moments
Tools

- Interrupt the stress response
- Reduce the reaction
  - Use cognitive messaging
    - Thought stopping
    - Thought insertion
- Practice turning down the emotion
- Resume normal activity level
WHAT YOU DO TO RELIEVE STRESS!!!!!!!!!!
Tools (contd.)

Try Acupuncture, Art, Awareness, Create, Cook, Dance, Dream, Draw, Exercise, Enjoy, Explore, Go Home, Kick-Box, Laugh, Limit work, Loosen up, Listen to music, Massage, Meditate, Practice Yoga, Paint, Pet the Pet, Sing, Sit Quietly, Sleep, Start a Book, Stretch, Talk to Yourself, Family and Friends, Wade, Walk, Watch a bug, or a movie or the sunset, Whistle, Wish

Do Something other than WORK
Perspective and Commitment

- Be realistic

- Commit to implementing self-care

- Recognize that the world won’t fall apart without you.

- LET GO
TIPS FOR STRESS SUCCESS

SMILE

- THERE ARE OVER EIGHTY MUSCLES IN THE FACE. THAT IS EIGHTY MUSCLES THAT CAN SHIFT YOU INTO A GOOD MOOD RIGHT NOW. GO ON. YOU CAN DO IT. DO IT FOR NO REASON. SMILE BECAUSE YOU CAN. SMILE BECAUSE YOU ARE ALIVE. SMILE BECAUSE YOU ARE BREATHING. SMILE BECAUSE YOU ARE THE ONLY ONE OF YOU. SMILE BECAUSE YOU KNOW WHAT MAKES YOU SMILE!
TIPS FOR STRESS SUCCESS

- GET REFRESHED
- DRINK A GLASS OF COOL WATER.
- EVEN THE SLIGHTEST LEVEL OF DEHYDRATION CAN CONTRIBUTE TO FEELINGS OF HIGHER STRESS. YOU MIGHT EXPERIENCE A SLIGHT HEADACHE AND EVEN A MILD SENSE OF NAUSEA WHEN YOUR WATER LEVEL IS LOW.
TIPS FOR STRESS SUCCESS

- RELAX YOUR EYES
- Take a moment to close your eyes and hold your palms over them. Enjoy the feeling of darkness and soothing calm. Still your mind and turn all of your focus towards calming and relaxing your eyes.
- It only takes a few minutes to feel calm, refreshed and ready to see things with a new view!
TIPS FOR STRESS SUCCESS

- WRITE IT OUT
- CLOSE YOUR DOOR AND IGNORE THE PHONE. GRAB A PIECE OF PAPER AND START WRITING WHATEVER COMES TO YOUR MIND. THIS IS JUST FOR YOUR EYES. WRITE FURIOUSLY FOR 10 MINUTES. KEEP WRITING AND DON’T LOOK BACK, EDIT, CORRECT, CHANGE OR DELETE. WRITE ANY SIZE, ANY TOPIC, ANYWHERE. NOW STOP AND TAKE A LOOK. THIS IS YOUR THINKING. TAKE A DEEP BREATH AND ENJOY HAVING IT OUTSIDE INSTEAD OF INSIDE YOUR HEAD.

HAVE A GREAT DAY!

STRESS TIP OF THE WEEK

STRESS NEEDS AN OUTLET.

WHEN YOU DON’T FIND A HEALTHY ONE, IT WILL FIND ITS OWN.
