

Clinical Issues in Contraception: A Focus on Progestin-Only Methods

Satellite Conference

Wednesday, July 13, 2005 • 2:00-4:00 p.m. (Central Time)

3:00-5:00 p.m. (Eastern Time) • 1:00-3:00 p.m. (Mountain Time) • 12:00-2:00 p.m. (Pacific Time)

This accredited program will give participants the ability to gain information and to ask the questions that are vital to the initiation and continued use of progestin-only methods of contraception, including the most current injectable methods. The content will address current issues and concerns relevant to the scientific data and to the clinical use of these agents. Structured counseling to enhance adherence to the chosen method will be provided emphasizing the newest addition to the injectable category of contraceptives.

Faculty:

Miriam Ziemann, MD
Associate Professor
Director, Family Planning
Department of Obstetrics and Gynecology
Emory University
Atlanta, Georgia

Carolyn Sutton, MS, WHNP, FAANP
Faculty Associate, Department of Obstetrics and Gynecology
Associate Director, Clinical Services
Utah Southwestern Medical Center
Dallas, Texas

Program Objectives:

1. Compare and contrast all progestin-only contraceptives.
2. Discuss critical considerations for clinical management.
3. Develop targeted counseling messages and strategies throughout the continuum of use.
