THROMBOLYTIC CHECKLIST - Cardiac Symptoms

Date: ________________  Incident #: ________________  Time: ________________

Destination: __________________________________________________________________

Patient Name: ____________________________________________________  D.O.B. ____________

Chief Complaint/Reason for 12 lead: _____________________________________________

12 Lead Acquired: Yes____  No____  12 Lead Transmitted: Yes____  No____

# of Transmission Attempts: ________  Mode of Transmission:  Cellular ____  Land____

Note: Always attempt to transmit ECG.  Paramedics Assessment of 12 lead (if any):______________________

_____________________________________________________________________________________________

Yes  No  Does the patient have:

___ ___ 1. Chest pain, or equivalent characteristic of myocardial ischemia, for at least 30 minutes. Pain has not
lapsed and is not relieved by NTG or position changes.

___ ___ 2. ECG ST segment elevation of at least 1 mm in at least two contiguous leads reflecting a single
myocardial region (Q waves are not a contraindication).

___ ___ 3. Elapsed time from onset of ischemia to evaluation less than twelve hours.

Yes  No  Exclusion Criteria. Potential Absolute Contraindications:

___ ___ 1. Active internal bleeding.

___ ___ 2. History of any CVA, intracranial neoplasm, arteriovenous malformations or aneurysm.

___ ___ 3. Recent (within 2 months) intracranial or intraspinal surgery or trauma.

___ ___ 4. Intracranial neoplasm, arteriovenous malformation, or aneurysm.

___ ___ 5. Past or present bleeding disorder.

___ ___ 6. Uncontrolled hypertension - systolic > 180 mm Hg, diastolic > 110 mm Hg.

___ ___ 7. Pregnancy.

Yes  No  Potential Relative Contraindications:

___ ___ 1. Diabetic hemorrhagic retinopathy or other hemorrhagic opthalmic conditions.

___ ___ 2. Prolonged CPR (longer than 10 minutes).

___ ___ 3. Recent (within 10 days) major surgery at noncompressable site (e.g. CABG).

___ ___ 4. Documented cerebrovascular disease.

___ ___ 5. Recent (within 7 days) gastrointestinal or genitourinary bleeding.

___ ___ 6. Significant liver dysfunction.

___ ___ 7. PHYSICALLY advanced age (>75 years with multiple disease states beyond AMI).

___ ___ 8. Patients currently receiving oral anticoagulants, e.g. warfarin sodium.

___ ___ 9. Previous thrombolytic therapy?

___ ___ 10. Trauma to the head in the last two weeks?

___ ___ 11. Surgery in the last two weeks?

___ ___ 12. Any trauma in the last two weeks?
