Booster doses of tetanus and diphtheria toxoids vaccine (Td) must be given 5-10 years after the preschool booster. However, effective for students entering sixth grade beginning fall of 2010, a booster dose of tetanus and diphtheria toxoids and acellular pertussis vaccine (Tdap) must be given at 11 or 12 years of age. This requirement will escalate by one successive grade each year for the following 6 years to include sixth through twelfth grades, beginning fall of 2016.
 - (b) 4 doses of inactivated polio vaccine. Only 3 doses are needed if the third dose was administered on or after the fourth birthday.

420-6-1-.04 Vaccine Shortages

When the State Health Officer determines that there is a vaccine shortage of one or more vaccines whether statewide or localized, affecting the ability of the health care system to assure that all children have access to age-appropriate immunizations required for school entrance by Alabama Administrative Code, Chapter 420-6-1-.03, the State Health Officer may notify affected health care providers about the supply shortage(s) and authorize such providers to validate a certificate of immunization despite one or more indicated, age-appropriate vaccinations not being administered because of vaccine shortage. Such validation will be accomplished by the provider affixing a department-supplied sticker to the individual child's certificate to indicate a new expiration date, not to exceed one year from the current date or the end of the school term for which the certificate is due, whichever shall be later.
